

Quick Start

Launch Clicker 6 to view the Quick Start page.

1. **Start writing** - New Document
2. **Make a book** - Landscape or Portrait
3. **View favorites** - Activities marked as favourites
4. **Recent files** - Files you recently worked with
5. **Make a Clicker Set** - Opens a new window of options (shown under **Create a New Clicker Set**)

Files

Click Files to see more options.

1. **Examples** - select from different ages and types
2. **Free Resources** - automatically takes you to the Crick software website to search for activities to download
3. **Computer** - find saved activities on your computer
4. **Desktop** - find saved activities on your desktop
5. **My Documents** - find saved activities in Documents

Writing Toolbar

Create a New Writing Document

1. From the Explorer window, select **Start Writing>New Document**, or from the toolbar, click on **Document>New Document**.
2. Click on the **Predictor** to access word prediction. Right click the word in the list to hear it read aloud. Select **Use Number Keys** to use the number keys to transfer the word to the document.
3. Read text aloud by: **Right clicking the word**, clicking the **Speak Text** button, or **adding punctuation** to the sentence.

Show Instant Pictures while writing:

1. From the menu bar, click on **Options**.
2. From the tabs in the new window, click **Media**.
3. Check the boxes where the Instant Pictures need to show when writing.

Create a New Clicker Set

New Clicker Set

Choose from **Grid** or **Page** wizards to help you create document or page based activities. Select **Templates** to find a page template to begin creating a customized activity.

Hover the mouse over a topic to see an overview of what the activity will look like. **Click** the topic to begin creating the activity.

Talk About
Create a picture-based activity to stimulate talking about any subject.

Clicker Wizards let you create an activity based on a previously made template. Follow the instructions to select options for a customized activity.

Clicker Templates let you choose which set to create based on different types of activities. Double click the folder icons and click the plus signs to expand the lists.

Working with Activities

The taskbar in the bottom left corner shows information about open activities.

1. The tabs are labeled with open activity names. Toggle back and forth between the tabs to access the activities.
2. **Edit Clicker Set** opens the editing pages with tools to modify the current activity.
3. **Explorer** opens the Quick Start and Files windows to access other activities.
